Experience

2021- 2022

- Led the design process, creating software product prototypes and user-friendly design flows.
- Collaborated cross-functionally to translate business requirements into intuitive interfaces.
- Conducted user research and usability testing, driving iterative design improvements.

- Developed interactive web and mobile apps using React, React Native, and Angular.
- Ensured responsive design and optimized performance for seamless user experiences.
- Translated UI/UX designs into pixel-perfect implementations.

- Collaborated on building robust REST APIs for software logic and business processes.
- Created scalable, efficient backend solutions, ensuring software reliability.
- Integrated frontend and backend components for fully functional applications.
